SRI reportedly selects Muto for polysilicon technology transfer

Nuying Huang, Taipei; Rodney Chan, DIGITIMES [Wednesday 20 February 2008]

Muto Silicon Corporation, a Taiwan-based polysilicon supplier founded by Yageo honorary chairman Wood MY Chen, has been selected by US-based SRI International as one of its partners in Taiwan for technology transfer, according to industry sources.

The sources claimed that SRI has selected two to three partners for the transfer of polysilicon technologies, with Muto being one of them.

SRI's contact window in Taiwan declined to comment, citing client confidentiality. Yageo also declined to comment on Muto's operations, which it described as Chen's personal business.

The sources pointed out that SRI uses the sodium reduction process to produce polysilicon.
