Molina de Segura, Spain: Soltec Energías Renovables Signs Module Supply Agreement with Suntech Power

Spanish systems integrator, Soltec Energías Renovables has signed a module supply with Suntech Power. Suntech will supply up to 50 megawatts of modules during 2009. Systems are expected to be installed in both Spain and other European countries.

Soltec will integrate the modules in to the company's 10k Series dual axis solar trackers, which capture maximum solar radiation from dawn until dusk and is capable of exceeding systems without a tracker by more than 40%. Soltec has installed around 14 megawatts of these systems in recent months.

Soltec has recently expanded internationally. The company has opened offices in Florence, Italy and also in Shaghai, China.
