

Yingli Green Energy to provide 1.5MW of PV modules to China Mobile

PV Tech - www.pv-tech.org

Yingli Green Energy Holding Company Limited publicized today that its principal operating subsidiary in China, Boading Tianwei Yingli New Energy Resources Co., will begin to distribute roughly 1.5MW of photovoltaic modules to China Mobile Communications Corporation, the biggest mobile phone operator in China.

Their bid made up over 31 percent of China Mobile's recent photovoltaic module gain. Tianwei Yingli hopes to enter into an explicit supply contract with China Mobile in late October or early November of this year.

"We are pleased that China Mobile selected Tianwei Yingli as one of its major PV module suppliers..." said Mr. Liansheng Miao, Chairman and CEO of Yingli Green Energy. "We have been working with China Mobile since 2002 when we helped them build some stand-alone solar power base stations in western China. Over the years, we have developed a productive working relationship and we look forward to further deepening it in the future."
