GCL Silicon's Xuzhou Phase III 10,500 MT Facility Successfully Produced the First Batch of High-Quality Polysilicon

On December 28, 2008, GCL Silicon's Phase III 10,500 MT polysilicon manufacturing facility located in Xuzhou, Jiangsu province, China, successfully produced the first batch of high-quality polysilicon. This step marks GCL Silicon's success in becoming one of the few polysilicon producers in the world with an annual capacity of over 10,000 MT.

Mr. Xue Zhong Chou, Vice-Chairman of GCL Group (parent company of GCL Silicon), Mr. Guo Min Zhu, Director of Jiangsu Zhongneng (subsidiary of GCL Silicon), and Mr. Hunter Jiang, CEO of GCL Silicon were present at the ceremony to mark the official start up of the Phase III polysilicon manufacturing facility.
